Surgical Critical Care: For the MRCS OSCE By Mazyar Kanani, Simon Lammy

Surgical practice has changed enormously since the first edition of Surgical Critical Care Vivas, as shown by the introduction of the MRCS Part B OSCE. This landmark book has been fully updated to reflect the latest NICE and SIGN guidelines and common ALS principles in critical care patients, as well as current ATLS® and CCrISP® guidelines (such as CT scanning in trauma). The alphabetical format of the previous edition is replaced by an ABCDE chapter format, incorporating an escalating level of diagnostic and management complexity in conjunction with a concise mini-bibliography in each chapter, enabling the reader to rapidly access the required information. Covering both non-ICU-based patients and basic fundamentals of ICU care, the chapters introduce standard definitions, pathological processes and diagnostic features, before discussing common investigations and suggested management plans. A must-have revision guide for all surgical trainees, from final year medical students through to junior surgical registrars.
