**Functional Movement Development Across the Life Span, 3e** By Donna J. Cech MS PT PCS DHS, Suzanne Tink Martin MACT PT

Providing a solid foundation in the normal development of functional movement, **Functional Movement Development Across the Life Span, 3rd Edition** helps you recognize and understand movement disorders and effectively manage patients with abnormal motor function. It begins with coverage of basic theory, motor development and motor control, and evaluation of function, then discusses the body systems contributing to functional movement, and defines functional movement outcomes in terms of age, vital functions, posture and balance, locomotion, prehension, and health and illness. This edition includes more clinical examples and applications, and updates data relating to typical performance on standardized tests of balance. Written by physical therapy experts Donna J. Cech and Suzanne "Tink" Martin, this book provides evidence-based information and tools you need to understand functional movement and manage patients' functional skills throughout the life span.

- **Over 200 illustrations, tables, and special features** clarify developmental concepts, address clinical implications, and summarize key points relating to clinical practice.
- **A focus on evidence-based information** covers development changes across the life span and how they impact function.
- **A logical, easy-to-read format** includes 15 chapters organized into three units covering basics, body systems, and age-related functional outcomes respectively.
- **Expanded integration of ICF (International Classification of Function)** aligns learning and critical thinking with current health care models.
- **Additional clinical examples** help you apply developmental information to clinical practice.
- **Expanded content on assessment of function** now includes discussion of participation level standardized assessments and assessments of quality-of-life scales.
- **More concise information** on the normal anatomy and physiology of each body system allows a sharper focus on development changes across the lifespan and how they impact function.

##### **Patti Wooden:**

As a student exactly feel bored in order to reading. If their teacher requested them to go to the library in order to make summary for some book, they are complained. Just very little students that has reading's heart and soul or real their pastime. They just do what the professor want, like asked to go to the library. They go

to there but nothing reading critically. Any students feel that reading through is not important, boring as well as can't see colorful images on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country.
