## Differential Equations: Theory, Technique and Practice, Second Edition (Textbooks in Mathematics) By Steven G. Krantz

"Krantz is a very prolific writer. He ... creates excellent examples and problem sets."

?Albert Boggess, Professor and Director of the School of Mathematics and Statistical Sciences, Arizona State University, Tempe, USA

Designed for a one- or two-semester undergraduate course, **Differential Equations: Theory, Technique and Practice, Second Edition** educates a new generation of mathematical scientists and engineers on differential equations. This edition continues to emphasize examples and mathematical modeling as well as promote analytical thinking to help students in future studies.

### New to the Second Edition

- Improved exercise sets and examples
- Reorganized material on numerical techniques
- Enriched presentation of predator-prey problems
- Updated material on nonlinear differential equations and dynamical systems
- A new appendix that reviews linear algebra

In each chapter, lively historical notes and mathematical nuggets enhance students' reading experience by offering perspectives on the lives of significant contributors to the discipline. "Anatomy of an Application" sections highlight rich applications from engineering, physics, and applied science. Problems for review and discovery also give students some open-ended material for exploration and further learning.

### Editorial Review

#### Review

"Retaining many of the strong aspects of the first edition, which received positive feedback from readers, the new edition focuses on clarity of exposition and examples, many of which feature applications of differential equations. ... Being an homage to the excellent writing skills of George Simmons and his well-known text on differential equations written back in 1972, this updated edition maintains the highest standards of mathematics exposition. Warmly recommended as a comprehensive and modern textbook on theory, methods, and applications of differential equations!"

?Zentralblatt MATH 1316

"Krantz is a very prolific writer. He...creates excellent examples and problem sets."

?Albert Boggess, Professor and Director of the School of Mathematics and Statistical Sciences, Arizona State University, Tempe, USA

#### About the Author

**Steven G. Krantz** is a professor of mathematics at Washington University in St. Louis. He has written more than 65 books and more than 175 scholarly papers and is the founding editor of the *Journal of Geometric Analysis*. An AMS Fellow, Dr. Krantz has been a recipient of the Chauvenet Prize, Beckenbach Book Award, and Kemper Prize. He received a Ph.D. from Princeton University.

### Users Review

#### From reader reviews:

##### Terry Tyrrell:

Do you really one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Aim to pick one book that you never know the inside because don't judge book by its handle may doesn't work at this point is difficult job because you are frightened that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer is usually Differential Equations: Theory, Technique and Practice, Second Edition (Textbooks in Mathematics) why because the fantastic cover that make you consider regarding the content will not disappoint an individual. The inside or content is actually fantastic as the outside or maybe cover. Your reading sixth sense will directly direct you to pick up this book.

##### Yvonne Tetrault:

The book untitled Differential Equations: Theory, Technique and Practice, Second Edition (Textbooks in Mathematics) contain a lot of information on it. The writer explains her idea with easy means. The language is very simple to implement all the people, so do not worry, you can easy to read it. The book was published by famous author. The author will take you in the new time of literary works. It is possible to read this book because you can please read on your smart phone, or program, so you can read the book with anywhere and

anytime. In a situation you wish to purchase the e-book, you can open their official web-site and order it. Have a nice learn.

### **George Medrano:**

In this period globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. The actual book that recommended for you is Differential Equations: Theory, Technique and Practice, Second Edition (Textbooks in Mathematics) this guide consist a lot of the information with the condition of this world now. This book was represented just how can the world has grown up. The terminology styles that writer use to explain it is easy to understand. The particular writer made some analysis when he makes this book. That's why this book suited all of you.

### **Henry Hedrick:**

A number of people said that they feel fed up when they reading a e-book. They are directly felt this when they get a half areas of the book. You can choose the book Differential Equations: Theory, Technique and Practice, Second Edition (Textbooks in Mathematics) to make your reading is interesting. Your personal skill of reading ability is developing when you such as reading. Try to choose straightforward book to make you enjoy to learn it and mingle the feeling about book and looking at especially. It is to be very first opinion for you to like to start a book and go through it. Beside that the book Differential Equations: Theory, Technique and Practice, Second Edition (Textbooks in Mathematics) can to be your friend when you're really feel alone and confuse in what must you're doing of this time.
