Handbook of Ecological Indicators for Assessment of Ecosystem Health, Second Edition (Applied Ecology and Environmental Management) From Brand: CRC Press

Continuing in the tradition of its bestselling predecessor, the **Handbook of Ecological Indicators for Assessment of Ecosystem Health, Second Edition** brings together world-class editors and contributors who have been at the forefront of ecosystem health assessment research for decades, to provide a sound approach to environmental management and sustainable development.

Significantly updated and expanded, this authoritative resource details a proven framework for selecting, evaluating, and validating ecological indicators for ecosystem health assessment. It guides readers through the application of this framework to a wide range of ecosystems, including wetlands, estuaries, coastal zones, lakes, forests, marine ecosystems, lagoons, agricultural systems, landscapes, and rivers. The text synthesizes material from a variety of books, journals, and private research, to consider biodiversity, energy needs, ecological economics, and natural capital in the measurement of ecological health.

Organized for ease of reference, the first part of the handbook provides the required theoretical background. It presents a complete overview of all relevant ecological indicators?including thermodynamics, resilience estimates, exergy, and emergy indicators. The second part focuses on how to effectively apply the ecological indicators to a number of important ecosystems. It includes many examples and case studies that clearly illustrate the advantages and disadvantages of each method for specific applications.

Offering first-hand insight and practical guidance from practitioners in the field, this complete resource supplies the tools and the well-rounded understanding required to diagnose the health of virtually any ecosystem with much improved

accuracy.

Editorial Review

About the Author

Dr. Sven Erik Jørgensen is a professor of environmental chemistry at Copenhagen University. He received a doctorate of engineering in environmental technology and a doctorate of science in ecological modeling. He is an honorable doctor of science at Coimbra University, Portugal, and at Dar es Salaam University, Tanzania. He was editor in chief of Ecological Modelling from the journal's inception in 1975 to 2009. He has also been the editor in chief of Encyclopedia of Ecology. In 2004 Dr. Jørgensen was awarded the Stockholm Water Prize and the Prigogine Prize. He was awarded the Einstein Professorship by the Chinese Academy of Science in 2005. In 2007 he received the Pascal medal and was elected a member of the European Academy of Science. He has written close to 350 papers, most of which have been published in international peer reviewed journals. He has edited or written 64 books. Dr. Jørgensen has given lectures and courses in ecological modeling, ecosystem theory, and ecological engineering worldwide.

Dr. Fu-Liu Xu is a professor at the College of Urban and Environmental Sciences, Peking University, China. He received his Ph.D. from the Department of Pharmaceutics and Analytical Chemistry, Faculty of Pharmaceutical Sciences, University of Copenhagen, Denmark. His research interests include ecosystem health and ecological indicators, system ecology and ecological modeling, ecotoxicology and risk assessment of POPs.

Dr. Robert Costanza is the Gordon and Lulie Gund Professor of Ecological Economics and founding director of the Gund Institute for Ecological Economics at the University of Vermont. His transdisciplinary research integrates the study of humans and the rest of nature to address research, policy and management issues on multiple scales, from small watersheds to the global system. He is co-founder and past president of the International Society for Ecological Economics, and was founding chief editor of the society's journal, Ecological Economics. He has published over 400 papers and 20 books. His awards include a Kellogg National Fellowship, the Society for Conservation Biology Distinguished Achievement Award, and a Pew Scholarship in Conservation and the Environment.

Users Review

From reader reviews:

Jody Watson:

In this 21st century, people become competitive in every single way. By being competitive now, people have to do something to make these individuals survive, being in the middle of the actual crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Yep, by reading a publication your ability to survive improve then having chance to stand up than other is high. For yourself who want to start reading any book, we give you this specific Handbook of Ecological Indicators for Assessment of Ecosystem Health, Second Edition (Applied Ecology and Environmental Management) book as nice and daily reading guide. Why, because this book is usually more than just a book.

Jason Allen:

Do you have something that suits you such as book? The guide lovers usually prefer to pick book like comic, short story and the biggest one is novel. Now, why not hoping Handbook of Ecological Indicators for Assessment of Ecosystem Health, Second Edition (Applied Ecology and Environmental Management) that give your enjoyment preference will be satisfied through reading this book. Reading behavior all over the world can be said as the way for people to know world much better then how they react in the direction of the world. It can't be mentioned constantly that reading addiction only for the geeky man or woman but for all of you who wants to end up being success person. So , for all of you who want to start looking at as your good habit, you could pick Handbook of Ecological Indicators for Assessment of Ecosystem Health, Second Edition (Applied Ecology and Environmental Management) become your starter.

Evelyn Ross:

This Handbook of Ecological Indicators for Assessment of Ecosystem Health, Second Edition (Applied Ecology and Environmental Management) is great guide for you because the content that is certainly full of information for you who else always deal with world and have to make decision every minute. This particular book reveal it data accurately using great manage word or we can say no rambling sentences in it. So if you are read the item hurriedly you can have whole information in it. Doesn't mean it only provides you with straight forward sentences but challenging core information with lovely delivering sentences. Having Handbook of Ecological Indicators for Assessment of Ecosystem Health, Second Edition (Applied Ecology and Environmental Management) in your hand like having the world in your arm, facts in it is not ridiculous one. We can say that no book that offer you world within ten or fifteen second right but this book already do that. So , this really is good reading book. Hello Mr. and Mrs. busy do you still doubt which?

Patricia Coulter:

With this era which is the greater individual or who has ability in doing something more are more treasured than other. Do you want to become among it? It is just simple strategy to have that. What you need to do is just spending your time almost no but quite enough to get a look at some books. On the list of books in the top list in your reading list is usually Handbook of Ecological Indicators for Assessment of Ecosystem Health, Second Edition (Applied Ecology and Environmental Management). This book which can be qualified as The Hungry Hillside can get you closer in getting precious person. By looking upwards and review this publication you can get many advantages.
