

MATLAB For Beginners: A Gentle Approach

By Peter I. Kattan

MATLAB For Beginners: A Gentle Approach By Peter I. Kattan

This book is written for people who wish to learn MATLAB for the first time. The book is really designed for beginners and students. In addition, the book is suitable for students and researchers in various disciplines ranging from engineers and scientists to biologists and environmental scientists. One of the objectives of writing this book is to introduce MATLAB and its powerful and simple computational abilities to students in high schools. The material presented is very easy and simple to understand - written in a gentle manner. The topics covered in the book include arithmetic operations, variables, mathematical functions, complex numbers, vectors, matrices, programming, graphs, solving equations, and an introduction to calculus. In addition, the MATLAB Symbolic Math Toolbox is emphasized in this book. There are also over 230 exercises at the ends of chapters for students to practice. Detailed solutions to all the exercises are provided in the second half of the book.

Editorial Review

Users Review

From reader reviews:

Kelsey Dehart:

In this 21st millennium, people become competitive in every way. By being competitive currently, people have do something to make them survives, being in the middle of the crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated that for a while is reading. Yeah, by reading a publication your ability to survive enhance then having chance to remain than other is high. For you personally who want to start reading a new book, we give you this kind of MATLAB For Beginners: A Gentle Approach book as nice and daily reading reserve. Why, because this book is more than just a book.

Avril Morris:

Nowadays reading books are more than want or need but also become a life style. This reading behavior give you lot of advantages. Associate programs you got of course the knowledge your information inside the book which improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want have more knowledge just go with education and learning books but if you want really feel happy read one with theme for entertaining such as comic or novel. The MATLAB For Beginners: A Gentle Approach is kind of publication which is giving the reader erratic experience.

Dominic Maddock:

Playing with family in a very park, coming to see the marine world or hanging out with friends is thing that usually you have done when you have spare time, in that case why you don't try factor that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love MATLAB For Beginners: A Gentle Approach, you may enjoy both. It is great combination right, you still desire to miss it? What kind of hang type is it? Oh can happen its mind hangout fellas. What? Still don't buy it, oh come on its called reading friends.

Jamie Norman:

That e-book can make you to feel relax. This particular book MATLAB For Beginners: A Gentle Approach was colorful and of course has pictures on the website. As we know that book MATLAB For Beginners: A Gentle Approach has many kinds or variety. Start from kids until teens. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore, not at all of book are make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading which.
