

Wireless Ad Hoc Networking: Personal-Area, Local-Area, and the Sensory-Area Networks (Wireless Networks and Mobile Communications)

From Brand: Auerbach Publications

Wireless Ad Hoc Networking: Personal-Area, Local-Area, and the Sensory-Area Networks (Wireless Networks and Mobile Communications) From Brand: Auerbach Publications

The rapid progress of mobile, wireless communication and embedded micro-sensing MEMS technologies has brought about the rise of pervasive computing. Wireless local-area networks (WLANs) and wireless personal-area networks (WPANs) are now common tools for many people, and it is predicted that wearable sensor networks will greatly improve everyday life as we know it.

By integrating these technologies into a pervasive system, we can access information and use computing resources anytime, anywhere, and with any device. Wireless Ad Hoc Networking: Personal-Area, Local-Area, and the Sensory-Area Networks covers these key technologies used in wireless ad hoc networks. The book is divided into three parts, each providing self-contained chapters written by international experts. Topics include networking architectures and protocols, cross-layer architectures, localization and location tracking, time synchronization, QoS and real-time, security and dependability, applications, modeling and performance evaluation, implementation and experience, and much more.

The book is novel in its single source presentation of ad hoc networking and related key technologies and applications over the platforms of personal area, sensory area, and local area networks. It is a valuable resource for those who work in or are interested in learning about the pervasive computing environment.

Users Review

From reader reviews:

Irma Hughes:

Have you spare time for a day? What do you do when you have far more or little spare time? Yep, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a stroll, shopping, or went to often the Mall. How about open or maybe read a book eligible Wireless Ad Hoc Networking: Personal-Area, Local-Area, and the Sensory-Area Networks (Wireless Networks and Mobile Communications)? Maybe it is being best activity for you. You recognize beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with their opinion or you have additional opinion?

Buddy Stewart:

The actual book Wireless Ad Hoc Networking: Personal-Area, Local-Area, and the Sensory-Area Networks (Wireless Networks and Mobile Communications) will bring you to definitely the new experience of reading a new book. The author style to clarify the idea is very unique. In case you try to find new book to read, this book very suited to you. The book Wireless Ad Hoc Networking: Personal-Area, Local-Area, and the Sensory-Area Networks (Wireless Networks and Mobile Communications) is much recommended to you to study. You can also get the e-book from your official web site, so you can quicker to read the book.

April Hanson:

Reading a book for being new life style in this year; every people loves to examine a book. When you examine a book you can get a large amount of benefit. When you read books, you can improve your knowledge, because book has a lot of information into it. The information that you will get depend on what forms of book that you have read. In order to get information about your study, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, along with soon. The Wireless Ad Hoc Networking: Personal-Area, Local-Area, and the Sensory-Area Networks (Wireless Networks and Mobile Communications) provide you with new experience in reading through a book.

Mandy Jackson:

As we know that book is important thing to add our understanding for everything. By a guide we can know everything you want. A book is a set of written, printed, illustrated or blank sheet. Every year had been exactly added. This publication Wireless Ad Hoc Networking: Personal-Area, Local-Area, and the Sensory-Area Networks (Wireless Networks and Mobile Communications) was filled about science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading the book. If you know how big selling point of a book, you can truly feel enjoy to read a publication. In the modern era like right now, many ways to get book that you just wanted.
