Fish Reproductive Biology: Implications for Assessment and Management

From Brand: Wiley-Blackwell

"The economic importance of fishes and their societal and cultural relevance provide powerful incentives for large-scale, sustained studies of their dynamics"
—**the Editors**

The overall goal of this book is to give a picture of the present use of information on fish reproductive biology in assessment and management and its potential for improving management of these resources.

Compiled by an international team of authors, each an expert in their field, this exceptional volume is divided into three major sections:

- Biology, population dynamics, and recruitment
- Information critical to successful assessment and management
- Incorporation of reproductive biology and recruitment considerations into management advice and strategies

Including over 100 diagrams, this book is essential reading for all fisheries scientists. Libraries in universities and research establishments where this subject is studied and taught should have copies on their shelves.

"As one author put it: the goal is to facilitate a 'dialogue between assessment scientists and biologists.' Readers of any specialty should accept this challenge, and this book is an excellent resource to aid them."

—*Fisheries*, March 2010

Editorial Review

Review

"This book would certainly be an excellent choice for a reading course. ... This is the kind of book that challenges the dogma of introductory courses as well as the methods professionals use to address familiar problems. Each chapter provides personal perspectives, highlights emerging case histories, and illuminates the background conversations that go on at professional conferences and assessment workshops." (*Fisheries*, March 2010)

From the Back Cover

"The economic importance of fishes and their societal and cultural relevance provide powerful incentives for large-scale, sustained studies of their dynamics"

Including over 100 diagrams, this book is essential reading for all fisheries scientists. Libraries in universities and research establishments where this subject is studied and taught should have copies on their shelves.

About the Author

Tore Jakobsen, Senior scientist and marine biologist with experience from fish stock assessment and management advice. Employed by IMR since 1970. Head of Demersal Fish Section 1992-1998; Chair of the Advisory Committee on Fishery Management (ACFM) of the International Council for the Exploration of the Sea (ICES) 1999-2002; National Expert on Fisheries Research Projects at the European Commission (DG FISH) 2002-2006.

Michael J Fogarty, Senior Scientist, Northeast Fisheries Science Center, head of the Ecosystem Assessment Program. Research interests and experience include climate effects on marine systems, fisheries ecology, and the dynamics of exploited fish and invertebrate populations.

Bernard A. Megrey, NOAA, National Marine Fisheries Service, Alaska Fisheries Center, Seattle, USA. Research fisheries biologist with NOAA's Alaska Fisheries Science Center, where he has worked since 1982. Extensive experience studying the dynamics of exploited fish populations, relationships of the bio-physical environment to recruitment variability, stock assessment, and climate impacts on marine ecosystems.

Erlend Moksness, Research Director, Institute of Marine Research, Norway. Fisheries biologist with background in recruitment in marine fish, fish ageing, stock enhancement of marine fishes and aquaculture

of marine fishes.

Users Review

From reader reviews:

Catherine Scott:

Playing with family in a very park, coming to see the water world or hanging out with friends is thing that usually you have done when you have spare time, subsequently why you don't try issue that really opposite from that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Fish Reproductive Biology: Implications for Assessment and Management, you are able to enjoy both. It is fine combination right, you still wish to miss it? What kind of hang type is it? Oh can happen its mind hangout people. What? Still don't buy it, oh come on its called reading friends.

Barbara Morton:

In this time globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You will see that now, a lot of publisher which print many kinds of book. Typically the book that recommended to your account is Fish Reproductive Biology: Implications for Assessment and Management this e-book consist a lot of the information in the condition of this world now. This kind of book was represented how do the world has grown up. The dialect styles that writer value to explain it is easy to understand. The writer made some analysis when he makes this book. Here is why this book appropriate all of you.

Donna Johnson:

Beside this particular Fish Reproductive Biology: Implications for Assessment and Management in your phone, it might give you a way to get closer to the new knowledge or information. The information and the knowledge you might got here is fresh from oven so don't always be worry if you feel like an previous people live in narrow commune. It is good thing to have Fish Reproductive Biology: Implications for Assessment and Management because this book offers to your account readable information. Do you sometimes have book but you do not get what it's all about. Oh come on, that will not happen if you have this in the hand. The Enjoyable set up here cannot be questionable, like treasuring beautiful island. Use you still want to miss this? Find this book along with read it from now!

Roman Morris:

Don't be worry for anyone who is afraid that this book can filled the space in your house, you could have it in e-book method, more simple and reachable. This specific Fish Reproductive Biology: Implications for Assessment and Management can give you a lot of good friends because by you investigating this one book you have thing that they don't and make you actually more like an interesting person. That book can be one of a step for you to get success. This e-book offer you information that maybe your friend doesn't recognize,

by knowing more than some other make you to be great persons. So , why hesitate? Let us have Fish Reproductive Biology: Implications for Assessment and Management.
