Molecular and Cellular MR Imaging From Brand: CRC Press

The ability of molecular and cellular imaging to track the survival, migration, and differentiation of cells *in vivo* as well as monitor particular gene expression in living subjects is rapidly moving from the research laboratory into daily clinical settings. The interdisciplinary nature of the field mandates a constant dialogue among molecular and cellular biology, chemistry, physics, image analysis, and drug discovery to develop and translate promising approaches into reliable scientific applications and viable clinical diagnostic tools.

Bringing together a select panel of internationally recognized authors, *Molecular and Cellular MR Imaging* provides a state-of-the-science overview of the multidisciplinary nature of the field and illustrates the application of these various sciences to investigate specific biological processes in animals and humans. Using a systematic organization to present diverse information, the text begins with an introductory chapter that defines cellular and molecular imaging and explains why magnetic resonance imaging (MRI) is the most versatile approach for noninvasive, *in vivo* studies. The first section examines the physicochemical principles of various contrast agents including paramagnetic, superparamagnetic, CEST, and PARACEST agents, as well as smart and sensing agents. The second section summarizes the wide variety of applications for molecular imaging of genes and of disease states. Contributions cover cancer, apoptosis, cardiovascular and neurodegenerative disease, and the use of pharmacological MRI. The third section is devoted to cellular imaging under a variety of applications, and the final section discusses the translational aspects and future directions of cellular and molecular MR imaging.

Molecular and Cellular MR Imaging highlights the diversity of skills required to translate advancements in various fields of research into practical applications that promise to revolutionize *in vivo* imaging as a diagnostic tool.

Molecular and Cellular MR Imaging From Brand: CRC Press Bibliography

- Rank: #2604016 in Books
- Brand: Brand: CRC Press
- Published on: 2007-03-28
- Original language: English
- Number of items: 1
- Dimensions: 10.00" h x 7.25" w x 1.00" l, 2.14 pounds
- Binding: Hardcover
- 440 pages

Editorial Review

About the Author

University of London, Dept. of Psychiatry, UK Johns Hopkins University School of Medicine, Baltimore, MD

Users Review

From reader reviews:

Johnny Allen:

What do you consider book? It is just for students as they are still students or this for all people in the world, the actual best subject for that? Just simply you can be answered for that query above. Every person has distinct personality and hobby for each other. Don't to be pressured someone or something that they don't desire do that. You must know how great as well as important the book Molecular and Cellular MR Imaging. All type of book is it possible to see on many methods. You can look for the internet resources or other social media.

John Enriquez:

Nowadays reading books be than want or need but also work as a life style. This reading addiction give you lot of advantages. Associate programs you got of course the knowledge even the information inside the book that improve your knowledge and information. The data you get based on what kind of e-book you read, if you want send more knowledge just go with education books but if you want feel happy read one having theme for entertaining for instance comic or novel. The actual Molecular and Cellular MR Imaging is kind of reserve which is giving the reader unforeseen experience.

Dixie Love:

Spent a free a chance to be fun activity to accomplish! A lot of people spent their spare time with their family, or their very own friends. Usually they undertaking activity like watching television, about to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Do you need to something different to fill your free time/ holiday? Can be reading a book is usually option to fill your free time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to test look for book, may be the reserve untitled Molecular and Cellular MR Imaging can be excellent book to read. May be it is usually best activity to you.

Troy Cochran:

You will get this Molecular and Cellular MR Imaging by check out the bookstore or Mall. Merely viewing or reviewing it might to be your solve problem if you get difficulties on your knowledge. Kinds of this guide

are various. Not only by simply written or printed but in addition can you enjoy this book by e-book. In the modern era such as now, you just looking from your mobile phone and searching what your problem. Right now, choose your own ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose proper ways for you.
