

Degrees of Belief: Subjective Probability and Engineering Judgment

By Steven G. Vick

Degrees of Belief: Subjective Probability and Engineering Judgment By Steven G. Vick

"Degrees of Belief: Subjective Probability and Engineering Judgment" artfully weaves together three elements at the very core of engineering: uncertainties in knowledge; inductive reasoning; and individual expertise. Written from a geotechnical and earth sciences perspective, it brings new meaning to these concepts for nearly any field of engineering, science, or technology decision making. It begins by examining the tension between theory and practice, showing how this is manifested in the different meanings of probability used in reliability and risk analysis. This book emphasizes the cognitive processes used in conceptualizing uncertainty, with techniques and tools for subjective probability assessment. Turning to what this requires, it lends substance to professional judgment by examining its diagnostic, inductive, and interpretive elements. It also investigates the nature of expertise by bringing to life such towering figures as Roebling, Stevens, and Terzaghi, and their monumental engineering achievements. Masterfully synthesizing a wide variety of sources in a way directly relevant to engineers, the book draws on the history and philosophy of science through the work of Thomas Kuhn and Henri Poincar. It provides a window on current behavioral research that applies it to everyday thinking. This is all richly illustrated by examples from practice, including a gripping reassessment of the 1986 Challenger incident as seen through the eyes of the engineers who experienced it. From philosophical foundations to nuts and bolts, this is a groundbreaking book of serious content and sparkling style sure to engage any engineer or scientist who thinks about what they do and how they do it.

Editorial Review

Users Review

From reader reviews:

Jon Farris:

What do you concerning book? It is not important together with you? Or just adding material when you want something to explain what yours problem? How about your extra time? Or are you busy individual? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? All people has many questions above. They must answer that question simply because just their can do this. It said that about guide. Book is familiar on every person. Yes, it is suitable. Because start from on jardín de infancia until university need this kind of Degrees of Belief: Subjective Probability and Engineering Judgment to read.

Rosalie Lloyd:

This book untitled Degrees of Belief: Subjective Probability and Engineering Judgment to be one of several books that best seller in this year, here is because when you read this reserve you can get a lot of benefit in it. You will easily to buy this book in the book store or you can order it by means of online. The publisher of the book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Mobile phone. So there is no reason for you to past this e-book from your list.

Edward Carroll:

You could spend your free time you just read this book this book. This Degrees of Belief: Subjective Probability and Engineering Judgment is simple to deliver you can read it in the area, in the beach, train along with soon. If you did not have got much space to bring typically the printed book, you can buy the particular e-book. It is make you much easier to read it. You can save the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

Rhonda Kirby:

As a university student exactly feel bored to reading. If their teacher asked them to go to the library or even make summary for some publication, they are complained. Just very little students that has reading's heart and soul or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that studying is not important, boring along with can't see colorful pics on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So, this Degrees of Belief: Subjective Probability and

Engineering Judgment can make you feel more interested to read.
