Forgotten Chemistry By Johanna Holm

This practical text-workbook will help you recapture the chemistry that got away. Each of 15 study units offers clear instruction and examples to help you brush up on the chemistry you studied in school but have since forgotten. Topics covered include the building blocks of chemistry (atoms, elements, compounds, and molecules), chemical nomenclature, balancing equations, stoichiometry, gases, solution chemistry, atomic theory, oxidation and reduction, acids and bases, organic chemistry, nuclear chemistry, chemical calculations, and much more. Hundreds of practice and review questions are presented with answers and explanations.
