Data-Driven Methods for Adaptive Spoken Dialogue Systems: Computational Learning for Conversational Interfaces From Brand: Springer

Data driven methods have long been used in Automatic Speech Recognition (ASR) and Text-To-Speech (TTS) synthesis and have more recently been introduced for dialogue management, spoken language understanding, and Natural Language Generation. Machine learning is now present “end-to-end” in Spoken Dialogue Systems (SDS). However, these techniques require data collection and annotation campaigns, which can be time-consuming and expensive, as well as dataset expansion by simulation. In this book, we provide an overview of the current state of the field and of recent advances, with a specific focus on adaptivity.

Editorial Review

Users Review

From reader reviews:

David Pell:

As people who live in the modest era should be revise about what going on or info even knowledge to make them keep up with the era and that is always change and progress. Some of you maybe can update themselves by examining books. It is a good choice for you but the problems coming to you actually is you don't know which you should start with. This Data-Driven Methods for Adaptive Spoken Dialogue Systems: Computational Learning for Conversational Interfaces is our recommendation to make you keep up with the world. Why, since this book serves what you want and want in this era.

Erich Arnold:

The reason why? Because this Data-Driven Methods for Adaptive Spoken Dialogue Systems: Computational Learning for Conversational Interfaces is an unordinary book that the inside of the book waiting for you to snap the item but latter it will distress you with the secret this inside. Reading this book next to it was fantastic author who else write the book in such amazing way makes the content inside of easier to understand, entertaining means but still convey the meaning entirely. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This amazing book will give you a lot of benefits than the other book get such as help improving your talent and your critical thinking means. So , still want to hold up having that book? If I were you I will go to the e-book store hurriedly.

Sarah Stiles:

Do you have something that you like such as book? The publication lovers usually prefer to pick book like comic, brief story and the biggest some may be novel. Now, why not hoping Data-Driven Methods for Adaptive Spoken Dialogue Systems: Computational Learning for Conversational Interfaces that give your enjoyment preference will be satisfied by simply reading this book. Reading routine all over the world can be said as the opportunity for people to know world better then how they react to the world. It can't be mentioned constantly that reading addiction only for the geeky person but for all of you who wants to be success person. So , for all you who want to start looking at as your good habit, you may pick Data-Driven Methods for Adaptive Spoken Dialogue Systems: Computational Learning for Conversational Interfaces become your starter.

Jack Jackson:

Beside this specific Data-Driven Methods for Adaptive Spoken Dialogue Systems: Computational Learning

for Conversational Interfaces in your phone, it could give you a way to get more close to the new knowledge or facts. The information and the knowledge you may got here is fresh from the oven so don't always be worry if you feel like an older people live in narrow community. It is good thing to have Data-Driven Methods for Adaptive Spoken Dialogue Systems: Computational Learning for Conversational Interfaces because this book offers to your account readable information. Do you occasionally have book but you don't get what it's interesting features of. Oh come on, that won't happen if you have this inside your hand. The Enjoyable arrangement here cannot be questionable, just like treasuring beautiful island. So do you still want to miss that? Find this book and also read it from right now!
