Lecture Notes on Ophthalmology By Bruce James, Chris Chew, Bron

Beautifully illustrated throughout, this new edition of *Lecture Notes on Ophthalmology* concentrates on the most common eye problems that medical students and doctors are expected to diagnose and manage. The book begins with a brief introduction to the structure and function of the eye and then focuses on core conditions in ophthalmology. The highly structured text is designed to facilitate easy access to information, making the book an ideal resource for revision. New additions include the introduction of a chapter on presenting complaints in the form of clinical cases and an increased emphasis on learning objectives. The book is also thoroughly updated to include material on recent advances in the treatment of diseases such as glaucoma and macular degeneration.

The result is a book that remains the most compact yet comprehensive guide to ophthalmology. It will appeal to medical students, junior doctors, optometry students, practising opticians, general practitioners, and ophthalmic nurses who want a concise introduction to the subject or an ideal revision companion.

Editorial Review

Review

COMMENTS ON 8TH ED

"The Lecture Notes series has always been a useful source for revision and this ophthalmology edition is not an exception. With an excellent balance of text, diagrams and colour photographs this book gives the reader an overview of the most important features of ophthalmology...I would definitely recommend it."

Eye News

"... the choice of subjects and depth of coverage reflects incidence and importance in ophthalmic practice and student examinations. Further, Prof Bron is one of the country's most respected academics - from this point of view he adds weight and value to this core text..."

Senior House Officer

"I have used this book in the past and probbaly will do prior to finals and I think it is very good, most suitable for undergraduate learning"

"I thoroughly support the publication of the new edition of this text. It has proved a success in the past and with the addition of revision questions, learning objectives and clinical scenarios/presentations, will continue to be so."

Student Reviewer - Leicester University

"A concise well paid out text with good photographs and explanatory diagrams, makes this tricky subject just a little more bearable. At this reasonable price, I wish that this book had been around last year when I bought a lesser quality text for almost double the price and hardly ever opened it. Only the short sighted would give this book a wide berth. Really worth a look."

Surgo - October 97

From the Back Cover

Beautifully illustrated throughout, this new edition of *Lecture Notes on Ophthalmology* concentrates on the most common eye problems that medical students and doctors are expected to diagnose and manage. The book begins with a brief introduction to the structure and function of the eye and then focuses on core conditions in ophthalmology. The highly structured text is designed to facilitate easy access to information, making the book an ideal resource for revision. New additions include the introduction of a chapter on presenting complaints in the form of clinical cases and an increased emphasis on learning objectives. The book is also thoroughly updated to include material on recent advances in the treatment of diseases such as glaucoma and macular degeneration.

- Focuses on the core information needed by students and junior doctors
- Integrates the basic structure and function of the eye with clinical ophthalmology

- Consistent approach to individual diseases makes it ideal for quick reference
- Extensively revised to include current views on ophthalmic disease and treatment
- New learning objectives at the start of each chapter and clinical cases to aid revision and self assessment

The result is a book that remains the most compact yet comprehensive guide to ophthalmology. It will appeal to medical students, junior doctors on foundation programmes, optometry students, practising opticians, general practitioners, and ophthalmic nurses who want a concise introduction to the subject or an ideal revision companion.

Users Review

From reader reviews:

Dolores Stiger:

Nowadays reading books be than want or need but also get a life style. This reading behavior give you lot of advantages. Associate programs you got of course the knowledge the actual information inside the book which improve your knowledge and information. The data you get based on what kind of book you read, if you want drive more knowledge just go with schooling books but if you want feel happy read one together with theme for entertaining including comic or novel. Typically the Lecture Notes on Ophthalmology is kind of publication which is giving the reader erratic experience.

Aimee Nguyen:

Reading a reserve tends to be new life style within this era globalization. With reading through you can get a lot of information that may give you benefit in your life. With book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their very own reader with their story or even their experience. Not only the story that share in the textbooks. But also they write about the data about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors on this planet always try to improve their talent in writing, they also doing some research before they write to the book. One of them is this Lecture Notes on Ophthalmology.

Steven Peterson:

Are you kind of hectic person, only have 10 or 15 minute in your morning to upgrading your mind expertise or thinking skill possibly analytical thinking? Then you are receiving problem with the book than can satisfy your short time to read it because this time you only find guide that need more time to be study. Lecture Notes on Ophthalmology can be your answer since it can be read by a person who have those short spare time problems.

Norma Barnes:

What is your hobby? Have you heard which question when you got learners? We believe that that concern was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And you also know that little person like reading or as looking at become their hobby. You need to understand that reading is very important and also book as to be the point. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You will find good news or update concerning something by book. Amount types of books that can you choose to use be your object. One of them is this Lecture Notes on Ophthalmology.
