MEMS: Design and Fabrication (Mechanical and Aerospace Engineering Series) From Brand: CRC Press

As our knowledge of microelectromechanical systems (MEMS) continues to grow, so does The MEMS Handbook. The field has changed so much that this Second Edition is now available in three volumes. Individually, each volume provides focused, authoritative treatment of specific areas of interest. Together, they comprise the most comprehensive collection of MEMS knowledge available, packaged in an attractive slipcase and offered at a substantial savings. This best-selling handbook is now more convenient than ever, and its coverage is unparalleled.

The second volume, MEMS: Design and Fabrication, details the techniques, technologies, and materials involved in designing and fabricating MEMS devices. It begins with an overview of MEMS materials and then examines in detail various fabrication and manufacturing methods, including LIGA and macromolding, X-ray based fabrication, EFAB® technology, and deep reactive ion etching. This book includes three new chapters on polymeric-based sensors and actuators, diagnostic tools, and molecular self-assembly. It is a thorough guide to the important aspects of design and fabrication.

MEMS: Design and Fabrication comprises contributions from the foremost experts in their respective specialties from around the world. Acclaimed author and expert Mohamed Gad-el-Hak has again raised the bar to set a new standard for excellence and authority in the fledgling fields of MEMS and nanotechnology.

MEMS: Design and Fabrication (Mechanical and Aerospace Engineering Series) From Brand: CRC Press Bibliography

- Sales Rank: #7406248 in Books
- Brand: Brand: CRC Press
- Published on: 2005-11-29
- Original language: English
- Number of items: 1
- Dimensions: 10.04" h x 1.45" w x 7.32" l, 2.54 pounds
- Binding: Hardcover
- 664 pages

Editorial Review

Users Review

From reader reviews:

Patrick Lyon:

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to be aware of everything in the world. Each reserve has different aim as well as goal; it means that guide has different type. Some people feel enjoy to spend their time to read a book. They may be reading whatever they consider because their hobby will be reading a book. Consider the person who don't like examining a book? Sometime, individual feel need book when they found difficult problem or perhaps exercise. Well, probably you will need this MEMS: Design and Fabrication (Mechanical and Aerospace Engineering Series).

Matilda Greiner:

This MEMS: Design and Fabrication (Mechanical and Aerospace Engineering Series) book is not really ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is information inside this publication incredible fresh, you will get info which is getting deeper a person read a lot of information you will get. That MEMS: Design and Fabrication (Mechanical and Aerospace Engineering Series) without we recognize teach the one who examining it become critical in considering and analyzing. Don't be worry MEMS: Design and Fabrication (Mechanical and Aerospace Engineering Series) can bring if you are and not make your case space or bookshelves' turn into full because you can have it within your lovely laptop even mobile phone. This MEMS: Design and Fabrication (Mechanical and Aerospace Engineering Series) having very good arrangement in word along with layout, so you will not experience uninterested in reading.

Frederick Roark:

Your reading 6th sense will not betray you actually, why because this MEMS: Design and Fabrication (Mechanical and Aerospace Engineering Series) publication written by well-known writer whose to say well how to make book which might be understand by anyone who all read the book. Written in good manner for you, dripping every ideas and writing skill only for eliminate your own hunger then you still skepticism MEMS: Design and Fabrication (Mechanical and Aerospace Engineering Series) as good book not merely by the cover but also from the content. This is one e-book that can break don't judge book by its handle, so do you still needing a different sixth sense to pick this!?! Oh come on your studying sixth sense already told you so why you have to listening to another sixth sense.

Rachel Morris:

Don't be worry if you are afraid that this book may filled the space in your house, you could have it in e-book method, more simple and reachable. This particular MEMS: Design and Fabrication (Mechanical and Aerospace Engineering Series) can give you a lot of friends because by you checking out this one book you have point that they don't and make you more like an interesting person. This book can be one of one step for you to get success. This guide offer you information that possibly your friend doesn't realize, by knowing more than other make you to be great persons. So , why hesitate? We need to have MEMS: Design and Fabrication (Mechanical and Aerospace Engineering Series).
